PROFILE SUMMARY

Multidisciplinary engineer with a completed Master's in Signal Processing and Imaging and a B.Sc. in Electrical & Electronics Engineering. Experienced in electronic system inspection, signal analysis, and real-time system monitoring. Background includes maintenance, compliance, embedded systems, and technical documentation. Demonstrates high attention to safety, hands-on learning, and adaptability in complex environments. Fluent in English and conversational in Norwegian. Open to 24/7 shift work and committed to high-performance operations.

EDUCATION

Aug 2021 – Nov 2024

M.Sc. in Signal Processing and Imaging — University of Oslo

Key Coursework:

- Statistical Signal Processing, Digital Image Analysis, Data Acquisition and Control, Applied Data Analysis and Machine Learning etc.

Tools & Languages – Python, LabVIEW, MATLAB.
Thesis: Assessing Ultrasound Image Filtering and Quality Metrics – A One-Dimensional Synthetic Framework (2025)

- Developed a synthetic signal evaluation system to analyse filtering performance in 1D.
- Applied real-time signal processing concepts with MATLAB and Python.

May 2014 – May 2018

B.Sc. in Electrical & Electronics Engineering — American International University – Bangladesh

Key Coursework:

- Electronics & VLSI: Analog & Digital Electronics, VLSI Circuits, Industrial Electronics
- Signal Processing & Control: Digital Signal Processing, Control Systems, Power Systems Analysis
- Embedded & Systems: Microcontroller & Microprocessor Systems, Digital Logic Design, Telecommunications Engineering
- Power & Circuits: Electrical Circuits (AC/DC), Electrical Machines, Power Transmission & Distribution

Final year project: Micro Hydro Floating Turbine (2017)

- Planned and managed the project as a team leader.
- Designed model and monitored financial aspects.
- Reduced project costs by 40%.

CERTIFICATION

Drone Pilot A2 Open Sub-Category provided by Netherlands Civil Aviation Authority

- Certified to operate drones in the A2 subcategory, enabling safe and legal flights closer to people than A3 category. Ideal for tasks like inspection, mapping, and close-range data collection in populated areas.

Currently Enrolled: PLC Programming & Industrial Automation (2025) (*Hands-on training in ladder logic, HMI, sensors, industrial controllers, etc.*)

ADDITIONAL COURSES

- Substation Designing
- Electrical Standards & Their Application
- Generator Preventive Maintenance

WORK EXPERIENCE

Jul 2020 – Dec 2020 **Executive (Compliance and Maintenance)** Amazing Fashion Ltd., Bangladesh

- Oversaw inspection/testing of electronic systems.
- Introduced maintenance improvements using electronics design principles.
- Collaborated with cross-disciplinary teams for safety compliance.

Jan 2013 – Feb 2014 **Officer Cadet** Bangladesh Navy

- Engaged in structured leadership and teamwork roles.
- Built foundation in discipline, problem-solving, and communication.

Oct 2021 – present **Chef, Direct Dialoguer** TGI Fridays, Adecco, Leger Uten Grenser

- Managed food preparation and service with efficiency in a high-volume environment.
- Engaged with the public to raise awareness and secure funding for humanitarian projects worldwide.

OTHER SKILLS

Simulation and Design Tools: AutoCAD, Arduino Nano, NI Multisim, PSpice, Altium Designer
Languages: English C1 (Fluent), Norwegian (Bokmål) B1 (Conversational), Hindi, Urdu
Communication and Interpersonal Skills:

- Team leadership, cross-functional collaboration
- Strong communication, analytical thinking
- Innovation-driven, structured, self-motivated

INTEREST

- Drone Operation and Aerial Tech.
- Robotics and Automation.
- Embedded Systems and IoT.
- Cooking, Indoor and Outdoor Sports, Competitive Online and Simulative Gaming.
